

Comprehensive Philanthropic and Wealth Data

DonorSearch provides some of the most comprehensive philanthropic, wealth and biographical data in the industry by following one simple strategy: using the best data possible from outside experts, and combining it with proprietary, in-house data available nowhere else.

Many firms use the same industry standard data. The problem is that much of that data, especially data from private corporations, is self-reported.

Instead, we use verified data to provide the most complete and accurate picture of a prospect or donor.
